

AIRPLANE TRAINING

Private Pilot

Learn to fly! STAGE 1 of the complete professional pilot course.

This is the first step in your aviation career! Becoming a private pilot will allow you to build time towards another rating, fly for fun, or give rides to your friends. This stage is also suited for those who desire to own an airplane for personal use.

During this stage you will be instructed on the basics of airplane flight. In the first phase you will learn basic flight maneuvers and procedures and solo the aircraft; this could be one of the most exciting flights you ever take! You will then refine your skills in preparation for your practical exam. Along the way you will also gain knowledge in and experience navigation and cross country flight planning.

Overall Total Airplane Flight Time:	50 hours	
Total Flight Time with Instructor: C150 Dual	40 hours	\$10,200
Total Solo Flight Time: C150 Solo	10 hours	\$1,500
Total Classroom Ground Time:	35 hours	\$465
Total Pre/Post Flight Briefing Time:	19.5 hours	\$1,755
Insurance(Cessna)		\$622
Average Time to Complete:	3 months	
Total Cost to Student:		\$14,542

Instrument

Learn to fly in the clouds!

Ever wonder how airline jets can fly in the clouds with zero visibility, cover vast distances and then end up at their exact destination? This is done only by reference to the instruments in the aircraft. This stage of flight training is much like chess; every move is strategically planned out. Learning how to do this is a vital skill that will make you a much safer, more confident and more employable pilot.

Overall Total Airplane Flight Time:	40 hours	
Total Flight Time with Instructor 20 Hours in C150 & 20 Hours in our Diamond: Dual	40 hours	\$11,500
Total Classroom Ground Time:	42 hours	\$570
Total Pre/Post Flight Briefing Time:	35 hours	\$3,675
Total Checkride Prep Time:	5 hours	\$525
Minimum Time to Complete:	1 month	
Total Cost to Student:		\$16,270

Commercial

Get paid to fly! THIS COURSE IS BUILT AROUND THE INSTRUMENT, CFI and CFII PILOT COURSE'S.

Getting paid to fly may be your dream, with a commercial license your dream could become a reality. During this stage you will become prepared for the practical demands of professional flying and qualified to fly most of the commonly-used civilian airplanes. Many advanced maneuvers are introduced and all skills are sharpened. Additional detail and depth regarding a pilot's ground knowledge will also be taken to the next level.

The major expense on this course is the solo time to bring the pilot's hours up to 250 hours total time. This can be accomplished in many ways but to show a price we have expressed it as solo in the Cessna. Feel free to contact Specialized Aviation for a consultation on the many options available to a pilot.

Specialized Aviation offers commercial airplane training over the Monterey Bay area. This region is perfect for commercial and IFR training in that it offers ease of departure from our uncontrolled airport unlike San Jose, Reid Hillview, Oakland, San Francisco, San Carlos, Palo Alto, Hayward, Concord, Livermore and Napa airports.

Our Mooney MSE is the perfect commercial training airplane due to its low operating costs, retractable gear and familiar flight characteristics. The new commercial student is also going to have not only a great aircraft and training environment but also a top quality facility to learn from. Specialized Aviation offers a comfortable study oriented facility with most of our instructors coming from the airline industry and commercial back grounds.

"Pilots looking for quality aircraft, maintenance and very experienced instructors are looking for Specialized Aviation."

Overall Total Flight Time:	119 hours	
Flight time in Diamond Star, with Instructor	15 hours	\$4,800
Flight time in Cessna 150, with Instructor	35 hours	\$8,925
Flight time in Cessna 150, Solo	69 hours	\$10,350
Total Classroom Ground Time:	30 hours	\$460
Total Pre/Post Flight Briefing Time:	23 hours	\$2,415
Minimum Time to Complete:	2 month	
Total Cost to Student (Student Rate):		\$26,950

Flight Instructor (CFI)

Learn to teach!

Usually a pilot's first job in an enjoyable career in aviation is as a Certified Flight Instructor (CFI). This position will allow you to build valuable experience while possessing a very rewarding (and sought-after) job. The flight instructor program will take you from the role of a student to a responsible, competent instructor. As an instructor you will teach both ground and flight lessons. You will also learn to be an effective communicator, motivator, and educator.

Overall Total Flight Time:	25 hours	
Total Flight Time with Instructor:	25 hours	\$6,875
Total Classroom Ground Time:	46 hours	\$575
Total Pre/Post Flight Briefing Time:	20.5 hours	\$2,152
Minimum Time to Complete:	2 months	
Total Cost to Student (Student Rate):		\$9,602

CFI Instrument (CFII)

Learn to teach in the clouds!

Take your flight instructor career to the next level and become an instrument instructor (CFII). Because the FAA requires at least 10 hours of instrument flight training for all commercial pilot applicants, many flight schools have found it necessary to hire CFII instructors. Going the extra mile and becoming a CFII will make you a much more qualified and employable instructor, allowing you to teach both VFR and IFR courses.

Total Flight Time with Instructor:	10 hours	\$3,200
Total Classroom Ground Time:	40 hours	\$560
Total Pre/Post Flight Ground Time:	3 hours	\$315
Minimum Time to Complete:	2 weeks	
Total Cost to Student (Student Rate):		\$4,075

Professional Pilot Program

All encompassing!

The Professional Pilot Program will give you the maximum training possible, at little additional expense. It is designed to develop the student with little or no experience into a pilot with a true competitive advantage. Specialized Aviation will tailor this comprehensive program for you the individual, mixing and matching what you need from private, instrument, commercial, CFI, and CFII programs. Average costs are listed below based on our regular program prices.

Total Flight Time:	250 hours	
Private Pilot	50 hours	\$14,542
Instrument Pilot	40 hours	\$16,270
Commercial Pilot	100 hours	\$26,950
CFI (Certified flight instructor)	193 hours	\$9,602
CFII (Certified flight instructor, instrument)	101 hours	\$4,075
Total Checkride Prep Time:	5 hours	\$545
Minimum Time to Complete:	6 months	
Total Cost to Student (Student Rate):		\$71,984
